PROFESSIONAL SUMMARY

2026 B.Tech Computer Science graduate with hands-on experience building, testing and deploying AI applications using Python, FastAPI, SQL, REST APIs, LLM APIs, RAG workflows, scikit-learn and transformer models. Built public AI analytics, fraud-risk, content-verification and GitHub review products. Strong in API integration, prompt/model-output evaluation, debugging, automated testing, deployment and technical documentation.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, HTML, CSS, PHP

AI/ML: LLM applications, RAG workflows, prompt engineering and testing, model-output evaluation, scikit-learn, transformer models, classification, Pandas, NumPy

Backend/Data: FastAPI, REST APIs, JSON, SQLite, API design, validation, database workflows

Tools/Practices: Git, GitHub, Streamlit, n8n, OpenAI/Gemini/Groq APIs, Vercel, Railway, automated testing, API testing, debugging, deployment, documentation

SELECTED PROJECTS

Aldssist V3 - AI Data Analytics Platform | 2026

- Built and deployed an AI analytics product for CSV, Excel, JSON and SQL with automated insights, charts, forecasting, natural-language Q&A and report export.
- Owned FastAPI APIs, persistence, testing, deployment and issue resolution; validated the backend with 131 passing automated tests and maintained public documentation.

ArchGuard - AI GitHub PR Architecture Review Bot | 2026

- Built a developer-facing AI review workflow using GitHub integrations, webhooks, REST APIs, structured verdicts, health checks, public demos and technical documentation.

AI Fraud Detection System | 2026

- Developed an explainable transaction-risk workflow using Python, FastAPI, SQLite, policy-based scoring and Streamlit; validated APIs and tested the end-to-end workflow.

Fake News Detection and Verification System | 2026

- Built a transformer- and Groq API-based verification workflow with explanations, user feedback, stored results, prompt testing and model-output quality evaluation.

EXPERIENCE

Data Analytics with Python Trainee - QSpiders / PySpiders | Bengaluru | Jan 2026 - May 2026

- Analyzed datasets using Python, SQL, Pandas, Excel and Power BI; performed cleaning, validation, exploratory analysis, dashboarding and reporting.

Full-Stack Web Development Intern - NumiTech Solutions | Ludhiana | Jun 2023 - Aug 2023

- Supported database-connected web modules, validation, debugging, functional testing and documentation using HTML, CSS, JavaScript, PHP and Git workflows.

Technical Content Creator - Technical MS YouTube Channel | Self-directed | 2020 - 2023

- Created and edited 400+ technical and short-form videos, strengthening structured communication, audience-focused explanation and deadline execution.

EDUCATION

B.Tech in Computer Science and Engineering - PCTE Institute of Engineering and Technology | Ludhiana, Punjab | 2022 - 2026

Relevant areas: Software engineering, databases, Python, data analytics, machine learning, web development and APIs.

ADDITIONAL INFORMATION

Target roles: AI Engineer Intern, GenAI Intern, Applied AI Intern, LLM Application Intern, AI Automation Intern | **Languages:** English, Hindi |

Availability: Open to relocate across India
