

Manish Soni

Python AI Developer · LLM Applications · Backend APIs

India · mmanishsoni70@gmail.com · github.com/manishsoni-dev · linkedin.com/in/manishsoni-dev

SUMMARY

B.Tech CSE Graduate building practical AI and backend projects around LLM applications, RAG-style workflows, developer tools, data analysis, and automation. Focused on systems that connect AI outputs with usable product workflows, APIs, and verification.

TARGET ROLES

AI Engineer Intern · GenAI / LLM Application Intern · Backend AI Intern · Python Developer Intern · Developer Tools Intern · Software Engineering Intern

PROJECTS

ArchGuard — AI GitHub PR Architecture Review Bot

TypeScript · Fastify · GitHub Apps

Live demo: demo-web-delta-five.vercel.app · Repo: github.com/manishsoni-dev/ArchGuard

- Built a GitHub App workflow that receives pull request webhooks and posts architecture review verdicts through GitHub Check Runs.
- Implemented a Fastify backend with Redis/BullMQ worker pipeline and Prisma/PostgreSQL persistence.
- Used repository context, ADRs, and codebase conventions for RAG-style architecture analysis with cautious verdicts such as FIT, DRIFT_RISK, and INSUFFICIENT_EVIDENCE.

Aidssist V3 — AI-Assisted Data Analytics Platform

Python · FastAPI · Pandas

Live demo: aidssist-v3.vercel.app · Repo: github.com/manishsoni-dev/aidssist

- Built an analytics workflow for uploading structured datasets, generating analysis-ready outputs, and reviewing charts, forecasts, and readable insights.
- Designed the product around practical data workflows instead of generic AI chat.

Aegis — Repository Repair Automation System

Python · CLI · pytest

- Built a mission-runner style workflow for repository analysis, repair proposals, verification, and evidence generation.
- Explored patch proposal handling, controlled apply/rollback concepts, repository memory, and Markdown/JSON evidence reports.

SKILLS

Languages & Backend: Python, TypeScript, FastAPI, Fastify, REST APIs, SQL	AI / ML / LLM: LLM Applications, RAG-style Retrieval, AI Agents, Repository Context Analysis, Pandas, NumPy, scikit-learn
Developer Tools / Infrastructure: Git, GitHub Apps, GitHub Webhooks, GitHub Checks API, Redis, BullMQ, Prisma, PostgreSQL, Vercel, Replit	Data / Analytics: Data Cleaning, EDA, Model Evaluation, Charts / Insights

EDUCATION

B.Tech CSE Graduate
